

MAYFLOWERSTONE

EmployeeOwned
Established 2006

Developer Range

iQuartz and iCeramic

Why Choose iQuartz?

- **Upgrade on Laminate** – More scratch, impact, heat and stain resistant and non porous.
- **Affordable** – iQuartz offers the same benefits as other quartz worktops but at a more affordable price point.
- **Stylish** – iQuartz creates a luxurious look

Design Aspects

- **Choice of thickness** - Available in 20mm and 30mm.
- **Colours** – Available in 8 colour patterns
- **Seamless Look** – Large format slabs (3200 x 1600 mm) reduce the number of joints.
- **Samples** - Show a small section of material, full slab images are available for reference. Slight variations may occur due to the manufacturing process.

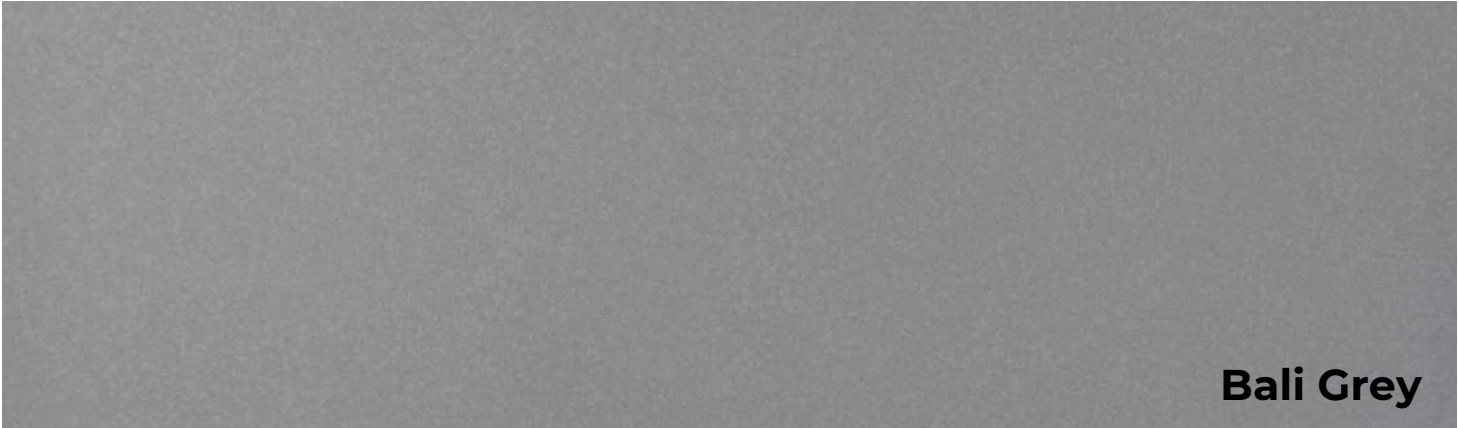

Why Choose iCeramic?

- **Durable & Practical** – More resistant to heat, stains, and scratches than quartz, iCeramic is designed to handle the demands of everyday living.
- **Cost-Effective** – iCeramic delivers the same benefits as other ceramic worktops at a more affordable price point.
- **Sustainable Choice** – Fully recyclable, iCeramic is one of the most environmentally responsible worktop solutions available.
- **Safe & Healthy** – iCeramic carries none of the health risks associated with Crystalline Silica in Quartz worktops

Design Aspects

- **Natural Inspiration** – Designs are inspired by natural stone, iCeramic combines beauty with practicality and is available in 12 colour patterns.
- **Seamless Look** – Large format slabs (3200 x 1600 mm) reduce the number of joints.
- **Samples** - Show a small section of material, full slab images are available for reference. Slight variations may occur due to the manufacturing process.
- **Uniform Core** - Ceramic slabs have a uniform core, this is visible on exposed edges, sink cut-outs and drainer grooves.
