

Hygienic

Totally non-porous, easy to clean with warm water and a cloth, stain proof and resistant against acids and solvents.

Resistant to heat

Unalterable at high temperatures, non-flammable and insensitive to UV rays.

Scratchproof

Very hard, highly scratchproof and resistant to abrasions.

Natural

Manufactured respecting the environment and protecting consumers, free of petroleum-derived products and resins with antibacterial properties.

7

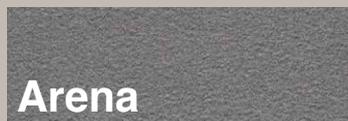

seven finishes for a countless amount of applications

Fossil

A coarser textured surface finish, with a "roughness" similar to the split face or flamed surface of natural stone.

Arena

A smooth and sand-like finish with a regular grain that confers a natural dynamism to the entire slab.

Lithos

A fine rough surface, ideal for kitchen worktops, exterior paving of yachts and swimming pools.

Dune

It recalls the sand of the desert, where the wind gently molds the landscape.

Vesuvio

A fine textured, tactile but smooth surface - similar to a leather finish on a fine grained granite.

Satin

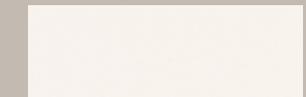

Soft matte finish with a silky texture and low sheen that is extremely easy to maintain.

Lux

A highly reflective polished finish that naturally enhances luminosity.

Lapitec[®]
Prestigious Italian Surface

Innovation & Design

without boundaries

The perfect example of Italian style.

Lapitec[®] is a “full body” sintered stone entirely developed and produced in Italy. It combines great aesthetic appeal with advanced physical and mechanical properties.

Lapitec[®] is manufactured in XXL size slabs (dimensions up to 3365x1500 mm)

Lapitec S.p.A.
