

silestone®
QXERON

The timeless surface. Now with zero crystalline silica.

Silestone QXeron® is Cosentino's high performance zero crystalline silica* surface made of up to 88% recycled materials, with a neutral, balanced and versatile colour palette suitable to enhance any surface application for interior design.

Decades of leadership in the surface industry for construction projects have led Cosentino to develop an exclusive technology to offer a new portfolio of zero crystalline silica* surfaces to cover all possible needs for interior surfaces.

The evolution of a market leader. A timeless surface that now returns with zero crystalline silica*, to offer an advanced approach into fine interior design solutions and enable a new era of zero crystalline silica* surfaces.
